## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 1\_Q6

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Joey is learning about bitwise operations and is working on a project that involves extracting specific bits from integers. He needs to write a program that takes an integer and the number of bits N as input and outputs the value of the lowest N bits of the integer.

Help Joey in his project to understand and visualize how bitwise operations work in practical scenarios.

##### ***Input Format***

The first line of input consists of an integer X, representing the given integer.

The second line consists of an integer N, representing the number of bits to extract.

### **Output Format**

The output displays "Result: " followed by an integer representing the value of the lowest N bits of the given integer.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 85

2

Output: Result: 1

### **Answer**

```
import java.io.*;
import java.util.Scanner;
class main{
    public static void main(String[] args){
        Scanner scan= new Scanner(System.in);
        int a= scan.nextInt();
        int b=scan.nextInt();
        int m=((1<<b)-1);
        // int m=((1<<b)-1) &a;

        int r=(a&m);
        System.out.println("Result: "+r);

    }
}
```

**Status : Correct**

**Marks : 10/10**
